REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/BR2004/000003

claim 1 relates to a process for the production of Niobium monoxide powder with **leakage current in the range of from 0.2 to 0.5 nA/CV**".

Since prior art (D1 and D2) disclose processes leading to powders having leakage currents equals or greater than 0.97 nA/CV, and since the same do not teach nor suggest how to reduce the said leakage current, the process of claim 1 is regarded as being novel and inventive over the said prior art.

Consequently, dependent process claims 2-17, as well as product claims 18 and 19 are regarded as being inventive.
